

I'm Rishabh Sharma.

I'm a India based computer science student, innvoator and webdesigner
creating awesome and effective applications and algorithms with some skill
and magic. Let's start scrolling and learn more about me.

About Me

I am a young computer science student. I have always been praised for my immense knowledge of computers, networks and troubleshooting. I had started designing websites when I was 11 years old using HTML and had worked my way upto CSS. I have interest in cryptography and network security. I believe that having the practical knowledge of how to use anything is very important in today's developing world.

It was a very good school driven towards shaping the students for today's world. During my 2 years there, I had participated and volunteered for many activities comprising of vaccination camps, maths fest, annual day, sports, extracurricular activities. I had also ran for the head boy.

WORK

-
-

SKILLS

I have picked up many skills along the way. Including Python 3, MySql, Web Designing, Cryptography, Networking, Creative writing from my years of schooling. I always believe in practical knowledge and therefore try to make use of things taught. One instance is when, we were taught MySql language, other students just used it create databases but I used it to create a messaging application between the connected systems and that is the creativity and the curiosity that I like and believe might give rise to great inventions.

HTML5

MYSQL

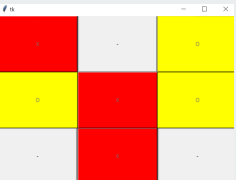

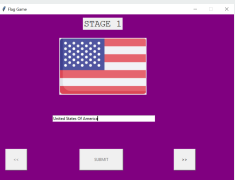

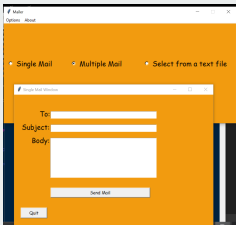

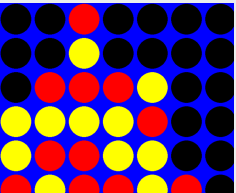

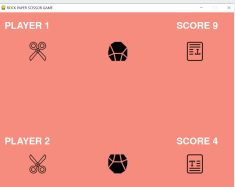

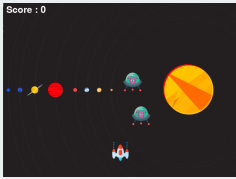

CSS

PYTHON3

CHECK OUT SOME OF MY WORKS.

Your work is going to fill a large part of your life, and the only way to be truly satisfied is to do what you believe is great work. And the only way to do great work is to love what you do. If you haven't found it yet, keep looking. Don't settle. As with all matters of the heart, you'll know when you find it.
